Subject: Project 34164 - Letter of Configuration (LOC) request for Consulting Services for the Mississippi Department of Public Safety

The Mississippi Department of Information Technology Services (ITS) is seeking the professional services of a vendor to review, research and update the existing Interface Control Document (ICD) as described below for the Mississippi Department of Public Safety's (MDPS) Criminal Information Center (CIC). Our records indicate that your company currently has a valid proposal on file at ITS in response to RFP# 3253 for Consulting Services. Our preliminary review of this proposal indicates that your company offers services that are appropriate to the requirements of this project. Therefore, we are requesting your configuration assistance for the services described below. Please submit a written response in accordance with the delivery instructions described herein.

I. GENERAL OVERVIEW

The Criminal Information Center has established and maintains a Mississippi Criminal History System (MCHS), the state's central repository for criminal records. In 1998, the CIC implemented 4 data input and query mechanisms for the MCHS. The MCHS provides fingerprint-based identification services to Mississippi law enforcement officials and is also used to process electronic submissions and inquiries to the Federal Bureau of Investigation (FBI) and other authorized national criminal justice systems. These data input/query mechanisms include:

- Transmission from directly connected workstations;
- Transmissions from terminal servers;
- Transmission from card scan devices; and
- Transmission via live scan devices.

The basis of this implementation is described in the attached Interface Control Document (ICD) of the Data Entry Subsystem, dated November 28, 1998. This document forms the basis of 'How To' interface to MCHS to input or query data. The ICD has not been updated since its creation in 1998. In this acquisition, vendors are being asked to perform the following services:

- Review the Data Entry Subsystem's Interface Control Document along with all successive change orders to the system
- Review the project contract and successive amendments relating to this system
- Interview users and staff to identify all changes that have been implemented since ICD development
- Document the current requirements for interfacing to the system, and
- Create an updated ICD to facilitate ease of use of the system by the wide range of users who input or query the data, and utilize the system.

Since the implementation in 1998, up to thirteen (13) change orders have occurred surrounding this system. All change orders may not have directly affected the interface to the system by it's clientele. However, vendor will be required to review change orders, contracts, documents and the software applications themselves, where applicable, to determine any changes that have occurred since the original implementation and to document usage changes to the ICD and procedure requirements to facilitate ease of use.

Information is input into this system by law enforcement officers, prosecutor's and court officers, and law enforcement organizations statewide and nationally, such as by the FBI. A copy of the current Interface Control Document is attached as Attachment A to this LOC request.

Additional information may be found at the MDPS website: www.dps.state.ms.us

29.1 This Contract constitutes the entire agreement of the parties with respect to the subject matter contained herein and supersedes and replaces any and all prior negotiations, understandings and agreements, written or oral, between the parties relating thereto. The ITS Contract Addendum, RFP No. 3253 and Contractor's Proposal in response to RFP No. 3253 are hereby incorporated into and made a part of this Contract.

29.2 The Contract made by and between the parties hereto shall consist of, and precedence is hereby established by the order of the following:

A higher order document shall supersede a lower order document to the extent necessary to resolve any conflict or inconsistency arising under the various provisions thereof; provided, however, that in the event an issue is addressed in one of the above mentioned documents but is not addressed in another of such documents, no conflict or inconsistency shall be deemed to occur by reason thereof. The documents listed above are shown in descending order of priority, that is, the highest document begins with the first listed document ("A. The ITS Contract Addendum") and the lowest document is listed last ("E. Contractor's Proposal").

ARTICLE 34 NETWORK SECURITY

Contractor and Customer understand and agree that the State of Mississippi's Enterprise Security Policy mandates that all remote access to and/or from the State network must be accomplished via a Virtual Private Network (VPN). If remote access is required at any time during the life of this Agreement, Contractor and Customer agree to implement/maintain a VPN for this connectivity. This required VPN must be IPSec-capable (ESP tunnel mode) and will terminate on a Cisco VPN-capable device (i.e. VPN concentrator, PIX firewall, etc.) on the State's premises. Contractor agrees that it must, at its expense, implement/maintain a compatible hardware/software solution to terminate the specified VPN on the Contractor's premises. The parties further understand and agree that the State protocol standard and architecture are based on industry-standard security protocols and manufacturer engaged at the time of contract execution. The State reserves the right to introduce a new protocol and architecture standard and require the Contractor to comply with same, in the event the industry introduces a more secure, robust protocol to replace IPSec/ESP and/or there is a change in the manufacturer engaged.

The parties understand and agree that ITS as contracting agent is not responsible or liable for the performance or non-performance of any of Customer's or Contractor's contractual obligations, financial or otherwise, contained within this Agreement.

ARTICLE 36 PERSONNEL ASSIGNMENT GUARANTEE

Contractor guarantees that the personnel assigned to this project will remain a part of the project throughout the duration of the Agreement as long as the personnel are employed by the Contractor and are not replaced by Contractor pursuant to the third paragraph of the Article herein titled "Employment Status". Contractor further agrees that the assigned personnel will function in the capacity for which their services were acquired throughout the life of the Agreement, and any failure by Contractor to so provide these persons shall entitle the State to terminate this Agreement for cause. Contractor agrees to pay the Customer fifty percent (50%) of the total contract amount if any of the assigned personnel is removed from the project prior to the ending date of the contract for reasons other than departure from Contractor's employment or replacement by Contractor pursuant to the third paragraph of the Article herein titled "Employment Status". Subject to the State's written approval, the Contractor may substitute qualified persons in the event of the separation of the incumbents therein from employment with Contractor or for other compelling reasons that are acceptable to the State, and may assign additional staff to provide technical support to Customer. The replacement personnel shall have equal or greater ability, experience and qualifications than the departing personnel, and shall be subject to the prior written approval of the Customer. The Contractor shall not permanently divert any staff member from meeting work schedules developed and approved under this Agreement unless approved in writing by the Customer. In the event of Contractor personnel loss or redirection, the services performed by the Contractor shall be uninterrupted and the Contractor shall report in required status reports its efforts and progress in finding replacements and the effect of the absence of those personnel.
